

# Soundcraft

Soundcraft<sup>®</sup>  
by HARMAN

Founded in 1973, Soundcraft designs, manufactures, and markets a wide range of professional mixing consoles for various applications. For 30 years, Soundcraft has been a leader in this market. Soundcraft's first step was the launch of Series 1, the first coffer console. In the early 70s, the touring business had just begun its development, and the transported consoles very quickly gained popularity among music groups, as well as rental companies, which also had just begun to provide equipment rental services.
