

# Filter set for IDEAL AP 40

## DESCRIPTION

Set of replacment filters for air purifier IDEAL AP 40. Innovative filter technology with microbiological protection provide hygienically pure indoor air. The set (1 packaging unit) includes: an antimicrobial True HEPA filter (orange) and a carbon anti-odour filter (black). The practical filter cassette can be changed simply and quickly. The CleanCel® fine prefilter (white/transparent) is not included in the replacement filter set - it's not necessary to exchange this filter as it can be cleaned if required. Filters highly effective pollutants such as fine dusts, pollen and other allergens, pathogens such as viruses and bacteria, mould spores, pet hairs, cigarette smoke, chemical vapours, and odours from the air. A filter change display informs about a pending filter change. On an average, the filters have to be changed after 12 months.

viruses & bacteria

pollen

animal hair

chemical fumes

dust

smell & odours

tobacco smoke

mold

aerosols

fine dust

building chemistry

exhaust fumes

The anti-microbial CleanCel™ equipment of the prefilter and the antimicrobial coating "MedShield" of the HEPA filter inhibit the growth of microbes and remove pathogens.

### Innovative AEON Blue® combination filter

High-performance, multi-stage filters cleanse the air of harmful substances.

### Almost 100% cleanliness

This highly effective filter binds up to 99.97% of all airborne fine dust and ultrasmall particles with a size of 0.3 microns.

### Simple filter change

The practical filter cassette can be changed simply and quickly.
