

Filter set for air washer IDEAL AW 60

Replacement filter set for air washer IDEAL AW 60. The combined filter system (HEPA filter with integrated carbon anti-odour filter) filters the intake air before it is washed and humidified. Water as a natural filter in combination with the additional HEPA combination filter binds e.g. dusts, allergens and particle-bound odours. For hygienically clean indoor air. The set (1 VE) includes: an antimicrobial True HEPA fine dust filter and a carbon anti-odour filter. The HEPA combination filter can be changed simply and quickly.

Innovative AEON Blue® combination filter

High-performance, multi-stage filters cleanse the air of harmful substances.

Almost 100% cleanliness

This highly effective HEPA fine dust filter with a separation performance of at least 99,97 % filters dusts and other allergy triggers of a size of 0,3 µm from the air (H13). Suitable for allergy sufferers.

Simple filter change

The practical filter cassette can be changed simply and quickly.
